

Thutothebe Handbook

What is Thutothebe?

Thutothebe embodies the ideology held by a group of individuals who have observed a gap in the education system of Botswana. The ideology seeks to tackle the root cause of most of Botswana's socio-economic challenges: apparent insufficiency of information available to the Youth. Although this closely relates to politics, Thutothebe decides to enlighten the people. It is in its core beliefs that if the Youth actively seek knowledge, it will open their eyes to a pool of possibilities previously untapped.

It goes without saying that all the youth empowerment may not be as sustainable as previously enchanted to us. Nor is our leadership as strong and committed to us as required. Thutothebe understands that people are a product of their community and thus seeks to rectify this.

We aim to nurture a generation of voracious readers and critical thinkers. To create a globally competitive society that starves for helpful knowledge. This is all in hopes of addressing our most prominent socio-economic challenges.

How does Thutothebe plan to address these?

Thutothebe has amassed a legion of enthusiasts who share the same intention and are eager to perform their service to their community. Their plan of action includes but not limited to:

- Motivation speaking – A wise man once said, “motivation seeks to ignite a fire in your belly, to give you cause to rise against your circumstances”. Thutothebe intends to facilitate just that.
- Knowledge – If there is anything worse than being un-informed is being mis-informed, hence our mandate includes disseminating noteworthy information for public consumption, at no cost to you.
- Mentorship – Thutothebe ambassadors and contributors are normal people in extraordinary pursuits. It is their pleasure to take on young aspirants to help them navigate the complexities of starting up.
- Awards and Considerations – for special activities which are to be rolled out as time goes.
